

Roll No.

57552

BBA 6th Semester (N.S.) 2014-17

Examination – July, 2021

SYSTEM ANALYSIS AND DESIGN

Paper : BBAN-602

Time : Three hours] [Maximum Marks : 80

Before answering the questions, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination.

Note : Question 1 is *compulsory* from section A, attempt any *four* questions from Section B, Selecting at least *one* question from each unit. all questions carry equal marks.

SECTION – A

1. (a) Components of System.
- (b) What is Decision tree ?
- (c) What is meant by Open-ended interview questions ?
- (d) Need of feasibility study.
- (e) Importance of ER data Model

57552-3850-(P-3)(Q-9)(21)

P. T. O.

- (f) What are different methods of information gathering ?
- (g) Major advantages of Distributed database
- (h) Data Replication

SECTION – B

UNIT – I

- 2. (a) What is System ? What are the characteristics and types of System ?
- (b) Discuss the role of System Analyst in System Analysis and Design.
- 3. Explain System development Life cycle (SDLC) in details. How cost benefit analysis play an important role in SDLC ?

UNIT – II

- 4. Explain various type of feasibility studies that the Analyst should consider. Explain the cost benefit analysis with an example.
- 5. Write short notes on :
 - (a) System Requirement Specification
 - (b) Data Dictionaries

UNIT – III

- 6. What is Data dictionary ? What are the reasons for using Data dictionary ? Explain the content of data dictionary ?
- 7. (a) Distinguish between initial investigation and feasibility study. In what way they are related.
- (b) What are data flow diagrams ? How they are different from structure charts ?

UNIT – IV

- 8. (a) What are the key issue to design distributed file system.
- (b) What are the advantages and disadvantages of Client-server architecture in the distributed computing ?
- (c) What are the different strategies of security mechanism for distributed system ?
- 9. What is Distributed database System ? Explain its architecture and type of architecture with diagram.
